

## **Production operative**

Are you interested in engineering, but maybe don't quite have the skills needed to get into the industry, then this may be the job for you.

Here at EPS Wiveliscombe Somerset, we are recruiting for the next member of our ever-growing team.

Due to expansion and the development of a new production line, we are currently looking for the next new member of our ever-growing team to work on our new production line.

The position will involve full training on several machines to help us manufacture service and maintain our clients Bandsaw needs, with full training provided to allow you to grow within your new role.

The role starts with 3 months 1-2-1 training with one of our experienced machine operators, working on an 8am – 4pm shift whilst training. We also stop for a 15-minute tea break at 10am which is paid for and 30-minute lunchbreak at 1pm each day.

Once you have completed your training you will then take ownership of your new production area but will continue to have ongoing support of the team as you grow and develop your skills moving forward. Once your initial training has been completed, your shift will change to 10am – 6.30pm Monday to Friday with a lunch break changing to 1.30pm for 30 minutes. There is also overtime available, which is paid at time and a half after 40 hours worked each week.

If you are someone who is punctual, reliable and is keen to learn a new profession in an industry that has a long-standing tradition throughout the world, then we would like to hear from you. Equally it would be an advantage if you have some experience in basic fabrication, or machine operating or basic mechanics, as this will help you with your training.

For more information, Please send a copy of your CV to [steveeagle@eps-services.co.uk](mailto:steveeagle@eps-services.co.uk) and I will be in contact to discuss your application with you in more detail.
