Production operative

Are you interested in engineering, but don't quite have the skills needed to get into the industry. Are you interested in learning a very rare and unique set of skills that are as important today as they were over 200 years ago. Literally anyone who cuts wood, plastics, metals etc will need our services as long as people are cutting. If this sounds interesting to you then read on.

Here at EPS Wiveliscombe Somerset, we are recruiting for the next member of our ever-growing team to work in our specialised small tooling area. This is a wide and varied role where no two days are the same. You will be involved making narrow band saws, involved in sharpening various forms of blades from circular saws to chainsaws, guillotines, turn over knives and much more.

The position will involve full training on all our machines to help you learn and harness your new skills. You will be working alongside some of the very best in the trade to learn, develop and grow your skills to become the best you can be in this field.

The hours of work are 8am - 4.30pm Monday to Friday. There is a little flexibility in these hours to suit your needs. Overtime is also available and is paid at time and a half after 40 hours completed each week. We have free parking on site. Free tea and coffee. Pension after 3 months service. Holiday allowance increases by 2 days per year after 2 years' service. Free tea, coffee & Hot chocolate.

If you are someone who is punctual, reliable and is keen to learn a new profession in an industry that has long-standing traditions throughout the world, then we want to hear from you. It would be an advantage if you have some experience in basic fabrication, or machine operating or basic mechanics, as this will help you with your training, however this is not essential.

If this is something that you would like to hear more about, then please send a copy of your CV to steveeagle@eps-services.co.uk and I will be in contact to discuss your application with you in more detail.
